

Cara Flash ROM LineageOS di Android One (Evercoss A65)

Ponsel : Evercoss A65

OS Laptop : Ubuntu 16.04

Unduh [ROM LineageOS](#), letakkan di MicroSD, masukkan/pasang microsd ke ponsel.

Untuk melakukan flash, lakukan langkah [ini dulu](#)

Masuk **mode fastboot**, **sambungkan ponsel ke laptop melalui kabel USB**.

Selanjutnya, lakukan format userdata sebagai berikut :

```
root@studio:~# fastboot format userdata
Creating filesystem with parameters:
  Size: 6375342080
  Block size: 4096
  Blocks per group: 32768
  Inodes per group: 8112
  Inode size: 256
  Journal blocks: 24320
  Label:
  Blocks: 1556480
  Block groups: 48
  Reserved block group size: 383
Created filesystem with 11/389376 inodes and 51835/1556480 blocks
target reported max download size of 134217728 bytes
erasing 'userdata'...
OKAY [ 3.567s]
sending 'userdata' (101301 KB)...
OKAY [ 4.766s]
writing 'userdata'...
OKAY [ 7.444s]
finished. total time: 15.777s
```

Unduh [CWM Recovery](#), flash ke ponsel.

```
root@studio:~# fastboot reboot-bootloader
rebooting into bootloader...
OKAY [ 0.002s]
finished. total time: 0.053s
root@studio:~# cd /home/samsul/Unduhan/Linux/AndroidOne/
root@studio:/home/samsul/Unduhan/Linux/AndroidOne# ls
A65_marshmallow.zip
lineage-14.1-20170827-UNOFFICIAL-sprout4.zip
link
recovery.img
RR-N-v5.8.5-20171005-sprout8-Final.zip
```

```
root@studio:/home/samsul/Unduhan/Linux/AndroidOne# fastboot flash recovery
recovery.img
target reported max download size of 134217728 bytes
sending 'recovery' (6002 KB)...
OKAY [ 0.290s]
writing 'recovery'...
OKAY [ 0.503s]
finished. total time: 0.793s
root@studio:/home/samsul/Unduhan/Linux/AndroidOne# fastboot reboot
rebooting...

finished. total time: 0.102s
root@studio:/home/samsul/Unduhan/Linux/AndroidOne# fastboot flash recovery
recovery.img
target reported max download size of 134217728 bytes
sending 'recovery' (6002 KB)...
OKAY [ 0.284s]
writing 'recovery'...
OKAY [ 0.462s]
finished. total time: 0.746s
```

Sampe di sini opsi recovery melalui ponsel masih masuk ke stock recovery. Paksaan supaya masuk ke recovery-nya CWM pake perintah berikut. Oiya, **ponsel mode fastboot, dan tersambung ke laptop melalui USB.**

```
root@studio:/home/samsul/Unduhan/Linux/AndroidOne# fastboot boot
recovery.img
downloading 'boot.img'...
OKAY [ 0.287s]
booting...
OKAY [ 0.061s]
finished. total time: 0.348s
```

Dengan demikian, ponsel akan masuk ke recovery CWM. Pilih update from zip, pilih/cari berkas lineage*.zip

Tunggu beberapa saat hingga proses selesai. Selamat menikmati **LineageOS**

Sekedar tambahan, agar dapat menginstall aplikasi, kita dapat menggunakan Yalp Store dari Fdroid. Atau gunakan opengapps. Unduh berkas dari <http://opengapps.org/>, pilih platform ARM, versi Android 7.1 (sesuaikan dengan versi di ponsel kita), variant Pico (atau sesuai kebutuhan).

Flash dengan CWM, caranya? masukkan ke microsd, matikan ponsel, nyalakan dengan menekan tombol volume up + power, pilih (dengan volume up) recovery, konfirmasi dengan volume down. pilih update from zip, pilih/cari berkas opengapps*.zip

Tunggu beberapa saat hingga proses selesai. Selamat menikmati **LineageOS** dengan opengapps. Sekarang kita dapat menginstall aplikasi dengan **Play Store**.
