

Cara Install & Menggunakan rbenv

Singkat saja, berikut caranya:

```
git clone https://github.com/rbenv/rbenv.git ~/.rbenv
git clone https://github.com/rbenv/ruby-build.git "$(rbenv
root)"/plugins/ruby-build
~/.rbenv/bin/rbenv init

# restart shell

# list latest stable versions:
rbenv install -l

# list all local versions:
rbenv install -L

# install a Ruby version:
rbenv install 3.4.4
```

CATATAN: jangan pake sudo

```
rbenv global 3.1.2 # set the default Ruby version for this machine
# or:
rbenv local 3.1.2 # set the Ruby version for this directory

# jalankan perintah gem seperti biasa
gem install bundler
```
