

Menghapus Sesi Tersimpan di Desktop XFCE

Saya menggunakan Ubuntu Studio 14.04, begini supaya sesi yang tersimpan dihapus secara otomatis ketika komputer dinyalakan. Sunting berkas **/etc/rc.local**, dan berikut isi berkas tersebut di laptop saya :

```
#!/bin/sh -e
#
# rc.local
#
# This script is executed at the end of each multiuser runlevel.
# Make sure that the script will "exit 0" on success or any other
# value on error.
#
# In order to enable or disable this script just change the execution
# bits.
#
# By default this script does nothing.

/usr/local/sbin/sshd -f /usr/local/etc/sshd_config

# service wifi_access_point stop

# hapus sesi agar tidak dijalankan ulang ketika login
rm -rf /home/samsul/.cache/sessions/*

# Yah, meskipun baru dinyalakan, network-manager akan selalu direstart
sleep 30
service network-manager restart

exit 0
```

Demikian.
