

Update Openssl

Download dan install :

```
curl https://www.openssl.org/source/openssl-1.0.1g.tar.gz | tar xz && sudo
./config && sudo make && sudo make install
```

Muncul error :

```
perl: warning: Falling back to the standard locale ("C").
cms.pod around line 457: Expected text after =item, not a number
cms.pod around line 461: Expected text after =item, not a number
cms.pod around line 465: Expected text after =item, not a number
cms.pod around line 470: Expected text after =item, not a number
cms.pod around line 474: Expected text after =item, not a number
POD document had syntax errors at /usr/bin/pod2man line 71.
make: *** [install_docs] Error 255
```

Install dengan :

```
sudo make install_sw
```

Ganti binari yang terinstall dengan yang baru :

```
sudo ln -sf /usr/local/ssl/bin/openssl `which openssl`
```

Lihat hasilnya :

```
openssl version
```

Outputnya sebagai berikut :

```
OpenSSL 1.0.1g 7 Apr 2014
```

Selesai...
